Subject: Re: FOIA request 2013-003438

John,

Thank you for both the NPDES permits and the attached DMRs.

The scanned versions of the older DMRs appear to be workable for my purpose. As you mentioned during our phone conversation, with a little bit of work the older sheets can be deciphered. If you could go ahead and scan just the year 2006 DMRs and send those over, I think we could consider this FOIA closed.

Once a bill is received I will promptly pay for these records.

Thank you so much for your help and professionalism.

Regards,

Brian

Brian,

As I had mentioned in my earlier email forwarding you the permits for the Bad River WWTF located in Odanah, we combined your request for the permits and your request for the DMRs under the above FOIA request number. According to FOIA, a response is due to you by March 8, 2013. You have always agreed to pay up to \$100 for the information. I provided to you copies of the permits on February 13, 2013.

Please find attached DMRs for the Bad River WWTF for the time period 2008-2012. Please note that prior to March 2009, the DMRs were carbonless forms and therefore can be hard to read when scanned. If you find that you would like hard copies, we could make copies of the forms to make them more readable, but that will take some additional time and there would be a charge for the copies. We also have the years 2006 and 2007 available for scanning or copying. We did not want to scan the documents if you didn't think you could use them.

There may be a limit on the size of the files being sent to you, so I may have to break this into multiple emails.

A bill will be sent you under separate cover.

John
